

What is claimed is:

1. A process for stain removal, comprising the steps of treating a stained area of a substrate with a solution of Chloramine- T, and allowing the solution to stand on the stained area for an effective period of time.
2. The process of claim 1 wherein the effective period of time is from about 5 minutes to about 12 hours, and the solution contains from about 0.05 to about 5 weight percent Chloramine -T.
3. The process of claim 1 wherein the solution of Chloramine- T further incorporates an effective amount of a wetting agent.
4. The process of claim 2 wherein the solution of Chloramine -T further incorporates an effective amount of a wetting agent.
5. The process of claim 3 wherein solution of Chloramine- T further incorporates an effective amount of a sodium or potassium phosphate salt.
6. The process of claim 4 wherein the concentration of Chloramine- T further incorporates an effective amount of a sodium or potassium phosphate salt.
7. The process of claim 3 wherein the concentration of Chloramine -T is from about 0.5 to about 3 weight percent, and the concentration of the wetting agent is from about 0.05 to about 1.0 weight percent and the wetting agent is anionic wetting agent.
8. The process of claim 4 wherein the concentration of Chloramine -T is from about 0.5 to about 3 weight percent, and the concentration of the wetting agent is from about 0.05 to about 1.0 weight percent and the wetting agent is a anionic wetting agent.

9. The process of claim 5 wherein the concentration of Chloramine -T is from about 0.2 to about 2 weight percent and the wetting agent is a nonionic wetting agent.
10. A process for removing a stain from an article of clothing which comprises the steps applying to the stained area, an aqueous solution containing from about 0.5 to about 3 weight percent Chloramine- T, from about 0.5 to about 1.0 weight percent of a nonionic wetting agent and from about 0.5 to about 5 weight percent of a sodium phosphate salt.
11. The process of claim 10 wherein the wetting agent is Avanel S-74 as is sold by BASF Chemical Co. of Mt. Olive, New Jersey and the sodium phosphate salt is trisodium phosphate.
